Risk Assessment

Risk	Type	Explanation	Likelihood	Severity	Outcome
Management swap	Development	Our contacts at Tazpit could change, thus slowing or halting our development	1	4	4
Change in requirements	Development, product	The organization will ask for changes in requirements during development	3	5	15
Unfeasible requirements	Development, product	The org wants a gps function that we don't believe is possible, might not be possible	2	5	10
technological obsolescence	Market, Development	We may need to change to a newer Android version to be able to use its GPS, which will affect our development	3	4	12
Spec change	Development	Some licensed products (software, servers) might not fit us, will waste money to try	5	4	20
Disease	Health, Development	New COVID strains may occur which will slow our testing phase by a lot	2	2	4

Impact / Probability	Low	Medium	High
75%-100%		Spec change	
50%-75%		technological obsolescence	Change in requirements
25%-50%	Disease		Unfeasible requirements
0%-25%		Management swap
